Purpose

Rumination Life Academy is a premium corporate and academic transformation platform that provides NLP-based behavioural transformation programs for Individuals, Academia, and Corporate organizations.

The website is designed to:

- Build credibility
 - Showcase transformation programs
 - Generate enquiries
 - Enable WhatsApp conversations
 - Present Rumination as a premium brand
-

2. Technology Stack

Frontend

- React
- TypeScript
- Vite
- Tailwind CSS
- Framer Motion
- Lucide React Icons

Communication

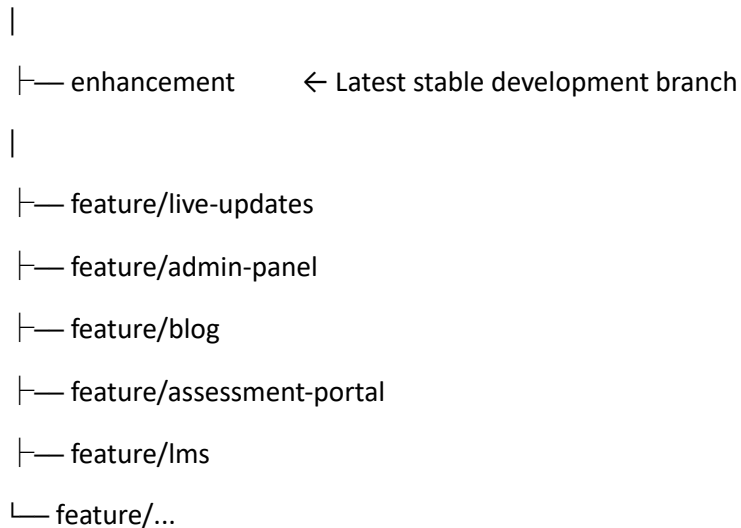

- EmailJS
- Titan Mail

Version Control

- Git
- GitHub

Branching Strategy for future development,

main

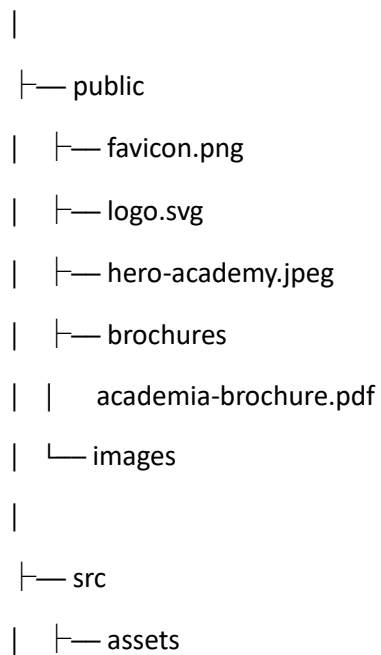

Deployment

- Vercel or Netlify (depending on production configuration)

3. Project Structure

project-root

```
| |— components
| |   Navbar.tsx
| |   Hero.tsx
| |   AboutFounder.tsx
| |   Transform.tsx
| |   RuminationMethod.tsx
| |   Testimonials.tsx
| |   Contact.tsx
| |   Footer.tsx
| |— App.tsx
| |— main.tsx
| |— index.css
|
|— package.json
|— tsconfig.json
|— vite.config.ts
└— README.md
```

4. Development Environment

Requirements

Node.js 22+

npm

Git

VS Code

Recommended Extensions

ESLint

Prettier

Tailwind CSS IntelliSense

GitLens

5. Installation

Clone

git clone <[repository](#)>

Install

npm install

Run

npm run dev

Build

npm run build

Preview

npm run preview

6. Environment Variables

Example

VITE_EMAILJS_SERVICE_ID=

VITE_EMAILJS_TEMPLATE_ID=

VITE_EMAILJS_PUBLIC_KEY=

Never commit actual production keys.

7. Application Flow

Titan Mail Inbox

8. Component Documentation

Navbar

Responsibilities

- Fixed navigation
- Responsive mobile menu
- Scroll navigation
- Program dropdown

Future Improvements

- Active section highlighting
- Sticky scroll progress

Hero

Purpose

Premium first impression.

Features

- Full-screen hero
- Galaxy background
- WhatsApp CTA
- Responsive typography

14. Responsive Behaviour

Desktop

≥1024px

Tablet

768–1023px

Mobile

≤767px

Every component must be tested on all breakpoints.

15. Coding Standards

Use TypeScript.

Prefer functional components.

No inline styles unless dynamic.

Tailwind utilities only.

Reuse components whenever possible.

16. Known Issues

- Browser favicon caching
 - EmailJS configuration must match template variables
 - Brochure file paths should be verified after deployment
 - Browser cache may delay asset updates
-

17. Future Roadmap

Priority 1

CMS

Live Updates

Blog

Priority 2

Assessment Portal

Student Dashboard

Trainer Dashboard

Priority 3

Learning Management System

Online Courses

Certificates

Analytics Dashboard

CRM Integration

18. Testing Checklist

✓ Responsive

✓ Contact Form

✓ WhatsApp

✓ Images

✓ Hero

✓ Programs

✓ Footer

✓ SEO

✓ Lighthouse

✓ Accessibility

19. Release Checklist

npm install

npm run build

Fix lint errors

Commit

Push

Verify deployment

Smoke test

20. Ownership Notes

Critical files

Hero.tsx

Navbar.tsx

Contact.tsx

RuminationMethod.tsx

Footer.tsx

Do not modify without testing responsive behaviour.

21. Troubleshooting

Blank Page

- Check browser console
- Run npm run build
- Check imports

Email Not Sending

- Verify EmailJS keys
- Verify template variables
- Verify service ID

Images Missing

- Ensure files exist under public/
- Check case-sensitive filenames

Deployment Failure

- Verify build succeeds locally
- Check environment variables
- Review deployment logs

22. Recommended Phase 2 Architecture

Introduce:

- Headless CMS
- Admin Portal
- Authentication
- Analytics
- Training Calendar
- Event Management
- Blog Engine
- Media Library
- Role-Based Access Control
- REST API / Backend
- Database
- CI/CD Pipeline

This allows the website to evolve into a scalable digital platform while preserving the existing React frontend.
